## SUMMARY

Cutting - Edge Mobile Application Developer skilled at working within Flutter and Android. Complex problem- solver with analytical and driven mindset. Understands and meets both client and employer requirements and develops highly functional, robust and easy-to-use applications. Excels as hands-on developer and oversees work of software teams with complete understanding of entire software development life-cycle.

## EDUCATION

Bachelor of Technology

- 2007 - 2011

## SUMMARY

I am a Lead Mobile Application Developer with over 10 years of experience in the industry. I have a proven track record of success in leading and managing teams of developers, delivering high-quality mobile applications on time. I am also an expert in all aspects of mobile app development, including design, development, testing, and deployment.

I am a highly motivated and results-oriented individual. I am passionate about building high-quality mobile applications that meet the needs of my users. I am also a team player and I am always willing to help others.

In my previous role at Amity Corporation, I was responsible for developing Amity Flutter SDK from scratch.

I am confident that I have the skills and experience to be a valuable asset to your team, make a significant contribution to your company, and help you achieve your business goals. I am eager to learn new things and I am always looking for ways to improve my skills. I am also a great communicator and I am able to work effectively with both technical and non-technical teams.

Feb 2022 - Present      Deputy Lead Flutter developer  
Amity

- Lead the development of Amity Flutter SDK. This includes working with a team of developers to design, implement, and test new features.
- Accountable for the successful execution of mobile projects and products including support and maintenance releases, minor functional releases, and major releases.
- Working on the POC for emerging technologies and coming up with proposals in order to compare pros and cons.
- Set technical standards and best practices for Flutter development. This includes ensuring that code is well-written, readable, and maintainable.
- Work with other engineers to improve the performance and scalability of Flutter applications. Identifying and fixing bottlenecks, and optimizing code for performance.
- Collaborate with product managers and designers to understand user requirements and translate them into technical specifications.
- Mentor and train junior developers, sharing knowledge and expertise and helping them to develop their skills.
- Stay up-to-date with the latest Flutter technologies and trends. This includes
- attending conferences, reading articles, and participating in online communities.
- Communicating with the Cross-platform team to make the product better and align the SDK with Other platforms.
- Follow the dart best practices for Amity SDK to keep the highest score on pub.dev
- **Achievement** - Build Chat SDK from scratch to functional within 1 Sprint time.
- **Achievement** - Increased 50% test coverage within 1 month period.
